

Front Security

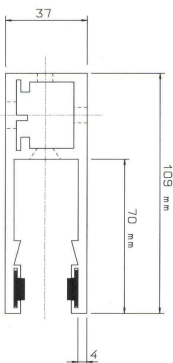

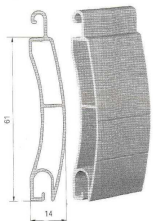

LUGGAGE SHUTTERS

TYP FS-B60

Standard complete equipment:

- aluminium anodic slats with a span of 60 mm.
- galvanized steel consoles
- axis with tubular engine
- solid aluminium anodic guides.
- galvanized housing
- measure made

Finish

Especially for the luggage shutters, we make notches on the bottom, safe and well finished including aluminium angles.

Options

- emergency manual operation with a crank in case of power failure
- the shutter, guides and enclosure can be coated in various RAL colours

The pressure of the shutter is designed and tested to the standard of 8 DaN.
